OBJECTIVE

I am a recent **university graduate** inspired to tackle complex problems pertaining to **web development** and user experience in an organization that values culture and collaboration.

EXPERIENCE

OPHEA, Toronto, ON — Web Communications Assistant

Jan 2022 – Oct 2022

Developed Javascript applications to assist and automate data-entry processes. Created web pages in a Drupal environment while formatting HTML content to improve the website's accessibility.

- Updated information on 1000+ Ontario Schools in two days using a custom script, saving 20 hours of manual data entry work.
- Performed throughout quality control checks to ensure the website had exceptional accessibility.

Freelance Web Developer, Toronto, ON

Feb 2019 – May 2022

Worked closely with clients to create websites for their businesses. Gained crucial skills in HTML, CSS, Javascript, React.js, PHP and Wordpress.

- Communicated closely with clients to translate their needs to a functional website.
- Used several Adobe programs to create and modify digital assets such as logos, images, videos and icons.

EDUCATION

University of Helsinki — Full stack Open 2022

Oct 2022 – Present

Course topics covered React, Redux, Node.js, MongoDB, GraphQL and TypeScript. Gained valuable knowledge on building full stack applications, version control and Javascript fundamentals.

OCAD U, Toronto, ON — Bachelor of Design (Digital Futures)

Sep 2018 – April 2022

Degree centered around web & mobile applications as well as game development, UX/UI and digital entrepreneurship. Course topics included front end web development, javascript fundamentals, physical computing, game engines and virtual reality.

SKILLS

HTML, CSS and Javascript

React Fundamentals (Node.js, Hooks, JSX, TypeScript, Redux)

Git & Github

MongoDB & Firebase

Adobe Programs (Illustrator, Photoshop, XD)

Wordpress

UX/UI fundamentals

PROJECTS

Social Media Clone — React JS App

Nov 2022

A fullstack React JS website for sharing your mood with the world. This project was an exercise in integrating MongoDB alongside HTTP requests in an interactive environment. The dark/light mode option is a subtle feature I incorporated to add visual flair using React's useContext Hook.

[Demo](#)

Pocket Bartender — React JS App

Sep 2022

A responsive React JS application with a focus on UX/UI built using Bootstrap. Features include, API calls, responsive design, animated CSS, a favourite system using local storage and search/filter capabilities.
